

Dinosaurs

By Brandan Stephens and Connor Alden

Dinosaurs roamed the earth
Millions of years ago

Stomping and crushing
Every mammal foe.

Most were large
And covered in scales

And had very long,
Big thrashing tails.

But not all were tall
And walking on ground.

Some were flying
And swimming all around.

Dinosaurs were unique
And their very own kind

But now they're extinct,
And trust me, I don't mind.
